Eliotes Dictionarie the second tyme en-  
riched, and more perfectly corrected, by Tho-  
mas Cooper, Schole maister of Maudlens in  
Oxford.

This last edition, beside the addition and  
correction of verie manie thynges, hath the  
proper names of most herbes that be agreed  
of among phisicians: the correction of weigh-  
tes, measures, and coynes, with the ap-  
plyinge of the same to our tyme.

I QUID EST IN ME

sedulitatis & industriæ (viri do-  
ctissimi) quam, pro viribus, sem-  
per studui in rebus agendis adhi-  
bere: Si quid ingenii, vel erudi-  
tionis: quod nunq̃ mihi satis am-  
plum visum est, ad amicorum me-  
rita prædicanda: id iure debeo,  
quantulumcunque est: in laudis &  
existimationis vestræ ornamen-  
tum conuertere. Cum enim pri-  
ma studiorum meorum incunabu-

la: et quicquid est ex eo tempore in literis a me positum: cogitatione  
et memoria complector: facile intelligo me vestra omnium singulari  
vsum beneuolentia et benignitate: tantisque sæpe cumulatam benefi-  
ciis: quanta tenuis hæc facultas mea verbis consequi nunquàm potest.  
Nam et tuum in me (Haddone præstantissime) animum, licet nuper  
admodum notitia sit inter nos, mirifice propensum intelligo: et cum  
cæteris eiusdem Gymnasii commilitonibus meis: tanta non studio-  
rum modo, sed animorum etiam coniunctione vixi: vt nihil prom-  
ptius habuerim aut paratius: quàm illorum operam, curam, diligen-  
tiam, studium, in omnibus rebus: quæ ad meam utilitatem pertinere  
videbantur. Quamobrem vehementer essem ingratus: si non cogi-  
tationes meas et ingenii neruos contenderem: vt (cum meritorem  
amplitudinem pari nequeam officio exquare) aliquam vobis darem  
mutuæ voluntatis significationem. Itaq; superioribus non multis  
abhinc mensibus: cum Elioræ Bibliothecam in manus, hoc consilio,  
resumerem: vt compluribus in locis castigatior, et non contemnenda  
verbo.

verborum supellectili ditior, in vulgus exiret: nihil videbam, nec meo in vos officio conuenientius, nec studio in me vestro dignius: quod ut hos labores meos, succisuius horis absolutos, nomini vestro consecrarem. Studium tamen hoc, et consilium meum non nihil remorata est suspicienda nominis Regii maiestas: cui, multorum iudicio, quantum in me esset, viderer detrudere: si, post illam, meis lucubrationibus alios vellem patronos ambire: praesertim cum, huius reuerentia, satis ab omnium iniuriis munita nostra videatur industria. Huius rei cogitatio, licet aliquantisper animum in diuersas partes traheret: non potuit tamen ab instituto penitus auocare. Nam ut primas officii mei partes Regiae Maiestati debitas fuisse plane confiteor, et libenter agnosco: ita secundas Gymnasium Magdalenense, quasi iure suo, videtur vendicare. Huius enim beneficio in artium liberalissimarum studiis educatus: eidem acceptam referre debeo qualemcumque sum consecutus vel ingenii vel eruditionis commendationem. Huc praeterea accedit: quod animo et cogitatione semper in hanc sententiam fui propensior: ut existimarem: hoc opus, tam spissum et varium, non modo imperatoriis egere viribus: ad coercendam inuidorum petulantiam: sed etiam hominum iudicio, in doctrinarum orbe vniuerso, consultissimorum: qui errata, quae me subterfugerent: et propter eximiam rerum cognitionem facillime possent deprehendere: et, propter singularem humanitatem libentissime vellent adnotare. Cuius notae, cum viderem hoc vestrum Musaeum nonnullos alere: et te in primis Haddone doctissime (qui propter singularem virtutis, ingenii, eruditionis praestantiam: praefectus eidem es constitutus) decretum mihi cum animo & constitutum erat: hoc quicquid est elucubrationis, sub vestro titulo in manus hominum emittere. Quid autem si his nouis laboribus consecutus: quod prior editio complexa non sit: malim vsu studiosos lectores experiri: quam mea praedicatione, quasi praconis voce, innotescere.

Videar enim fortasse quibusdam, tanquam negotiator avarus, inutiles merces in ipso statim ingressu ostentare. Vos autem si hanc qualemcumque significationem animi erga vos

mei benigne acceperitis: stimulos addetis vehementissimos, ad ea perficienda: quae, & reip. non minus vtilia sint: & vobis multo magis iucunda.

Valere.

Commoda si quis aues, operis nouisse recentis: Cooperi illa tibi tradet epistolion. Sin cupis & sentire labor sit quantus in illis: Quae huc congesta vides perlege, deinde scies. Hac qui contulerant, omnes voluisse videntur Angligenas pueros reddere Timotheos. Et plane felix puer est, cui tot documenta Sint veluti in cunis tradita molliculis. Anglia nunc dicat, felix aetas Edoardi, Quo puero, pueris optima quaeque cadunt.

NICOLAUS GRIMOALDVS,  
ad lectorem.

Mensibus, ecce, nouis iterum sunt horrea plena: Vt sibus ut promas, o philomuse, tuis. Sequi adeo victos duri fateantur agrestes. Rustica res tanti nulla laboris eget. Quid non expugnat vigilans industria? Quid non Mens, ardore, potest? sedulitate, manus? Scriptores recitant quae multa uocabula multi: Omnia sunt vno dinumerata libro. Hic, patrias voces omnes, formasque loquendi: Romanosque omnes vnica Anglia habet. Verba, notae rerum, sic ordine cuncta notantur: Vno ut contuitu, singula nosse queas. Quis caruere patres, tantoque feruntur honore: His operis fretus, tu mihi quantus eris?

**To the most puissant and mightie prince Edward the. vi.**  
 by the grace of god kyng of Englande, France and Irelande, defender of the  
 faith, and of the church of Englande, and also of Irelande in earth the  
 supreme head: your most humble and obedient subiecte Thomas  
 Cooper hartely wyssheth all grace and peace from god  
 with long reigne, honour, helth and prosperitee.

**When** I had attayned my labours (suche as  
 they be) in cassigatyng and augmentyng this Dictionarye, in time  
 past compiled by Sir Thomas Eliote, and dedicated to the most re-  
 uerend prince your deare and louyng father: I longe doubted  
 with my selfe (most gracious soueraigne lord) whether I shoulde  
 in like maner might be so bolde, as to exhibite the same to your  
 Imperiall maiestie. My low estate and base condition a longe tyme did beare me  
 backe, and greatly abasshe me. For in bedde I thought it a thyng verie vnseemely, and  
 a great presumption in me so simple a person, to let abrode the cassigation of suche  
 a worke vnder the name, title, and protection of so noble and great a prince: yet, con-  
 sideryng and weighyng in my mynde, the benigne Clemencie, that so brightely shyn-  
 neth in your most gracious countenance, and the excellent towardnesse of vertue, god-  
 ly zeale and seruient desyre of good learning, that already appeareth in your high-  
 nesse, I was wonderfully encouraged, and conceiued a great boldnesse hardily to ad-  
 uenture the same. And this also did comforte and put me forth greatly, that your  
 highnesse (as all noble princes are wont) not onely in the gestes and presentes, but  
 also in other woorkes and enterpryses of your faithfull subiectes, doeth vndoubtedly  
 more wright and consider the herte, true meaning, and honest endeavour, than the  
 power or woorthinesse of the person: the benefite and profite that maie growe thereby  
 to your realmes and dominions, than any other cause or qualitee, that can be ima-  
 gined to commend and sette forth the thyng. So that now (by consideration of  
 these thynges) I am thoroughly perswaded, that I can not accomplishe the dutie of  
 a kynde and louyng subiecte, vnlesse I dooe with this simple token or peece earnest  
 prayme geue our testimonie of my good hert toward your maiestie, and glad mynd for  
 the wonderfull grace and towardnesse that dooeth so aboundantly shew and declare  
 it selfe in your highnesse minoritye and childhode. For what subiecte indued with  
 common sense and reason, doeth not euen now in these your tender yeres clerely per-  
 ceitue your godly inclination, disposed so to rule and gouerne vs in vertue and true  
 religion, that of all nations we maie iudge our selves to be most happie and fortun-  
 ate? For this thyng, chiefly, we are bounde daily on our knees with lowly her-  
 tes, to geue most humble thanks to god, who pityng our estate, of a singular fa-  
 uour and mercie toward this realme of Englande, sent you to reigne ouer vs. Se-  
 condly we ought to loue and honourably fauour in our hertes your moste noble and  
 deare vncle Edward Duke of Somerset, who, besides the protection of all your  
 realmes and louyng subiectes, is not onely still carefull to preserue your roiall per-  
 son from all maner perilles and ioperdies, but also that you be in suchewise and so  
 godly traded by in all kindes of vertuous doctrine, as you maie be moste woorthy and  
 hable to haue the gouernance of your most noble realmes and dominions. And for  
 this cause were ryght prudently provided for your highnesse, suche and so excellent in-  
 structours, as scantly the like in vertue and learning maie in any place be founden.  
 Whose godly instructions and vertuous counsailes, how effectually they take place in  
 your sacred maiesties breast, it doeth right well appeare to all them that attende

Upon your roiall person, by the sage and godly talke that proceedeth from your most gracious mouth. We here abode, and by your most godly proceedynges evidently perceiue, holde your grace willeth, that your deare vncle and other most honourable counsaillours and ministers, shoulde endeavour and applie them selves, first, to set by true religion to gods honour and glorie, to abolishe idolatrie and superstition: and than consequently to proceede foorth to the aduancement of the common weale, that is, truly to minister iustice, to restraine extortion and oppression: to set by tillage and good husbandrie, wherby the people maie increase and be maintained: your godly herte wolde not haue wilde beastes increase and men decaye: grounde so enclosed by, that your people shoulde lacke foode and sustinauce: one man by shutting in of fieldes and pastures, to be made, and an hundred thereby to be destroyed. O godly herte, O prince most woorthy to reigne, not ouer two or three realmes, but ouer the whole worlde. Suche talke hath seldome been heard of princes of full age, perfite discretion, and longe reigne. wherfore the vncertaine comfort and ioye that all your louyng subiectes do take at this your wise and discrete deuising and commynyng, and many other lively sparkes and certeine tokens of vertue and Christian regiment, can not be sufficiently exprest: yea vndoubtedly many english hertes haue conceived an vnseigned hope, that your maiestie, shewing your selfe so sage, so graue, so prudent, in your tendre youth, shoulde as verie Salomon by wisdom bring the worlde from tumulte and rusling, to restfull quietnesse: from warre, to peace: from hatred and disorde, to loue and amitie: from contentious fectes and opinions, to one Christian unitie and true religion. Surely I saie many are fully perswaded, that the eternall wisdom and secrete counsaile of God, hath ordeined your highnesse this to doe, to his great honour, your immortall praise, and the weale and profite of all your louyng subiectes. Some perchance will meruaile why I speake not of your high magnificence, of your great and large gestes of fortune, realmes, dominions, palaces most richely adorned, treasure, precious stones and iewels: for whiche kynges are wonte to be highly magnified and praised. Those (most benigne and gracious soueraigne) shine not so bright, ne are so beautiful in mine eyes, nor yet to be so greatly esteemed of any Christian hert, as are the diuine gestes, with the whiche your most roiall breast is indued: The precious Margarite Sapience, whom you so louingly embrace, whiche shall make your kyngdome stronge for euer: Science of gods worde most gracious, that you so earnestly fauour, whiche shall cause you euer to loue and dreade hym, and know still whose minister ye be: Your so great to god and your commons, that shall alwaie kepe and surely defende you: Justice, so vprightly weighing as well the cause of the poore as the riche, whiche shall alwaie fortifie and establishe your most noble kyngdomes. These thinges do most adorne the maiestie of great monarches, and rulers of the worlde, these thinges (moste gracious prince) doe more magnifie and sette foorth your roiall name a thousande folde, than all the riches of the worlde and gestes of fortune. whiche, not withstanding, your highnesse hath in great aboundance: wherto, our continuall praier is, that the almightie lorde will vouchesafte to graunt, yet still more and more increase of all grace, long life, wealth and condigne felicitie, and finally make perfite in you that excellent image of a Christian gouernour, that his wisdom and gracious hand hath already wonderfully framed and begonne, to our great comforte. Amen.

The profite and commoditie of these my labours, and the maner of the whole worke, that I haue so boldly enterprised to publishe in your maiesties name, is sufficiently described and sette foorth in a latine epistole here folowying, for that onely purpose, made and entitled to the indifferent reader: whiche I thought not conuenient here to repeat, God saue your maiestie.

JO THO. COOPERVS CAN.  
DIDO LECTORI SA-  
LVTEM.

ELIOTA, VIR IN PRIMIS BONARUM LITERARUM STUDIOsus, & multis nominibus optime de republica meritis: cum Bibliothecam suam aggregaretur: maleuolorum calumnias, & reprehensiones se plurimum vereri: & hanc operam Criticorum dentibus esse valde obnoxiam predicabat. Solent enim huiusmodi homines, in alienis laboribus, non quæ vtilia videantur obseruare: sed quæ imprudentia præterlapsa sint, summo studio notare & carpere: adeoq; singulos conuellere literarum apices: vt, si quid paulum modo retortum sit: id suo more conuitiis exagitent. Cui, mens quàm vera præfagebat: vel hinc satis perspicuum est: quod Dictionarium huius Latino-anglicum, mirifico studiosæ iuuentutis amore exceptum, postquam errata quædam essent in eodem deprehensa: ita capit maledictis figi: ac si Eliota nullam fuisset industria sua laudem meritis: nec tantis quicquàm laboribus doctrinæ & literarum studiosis prouisset. Quamobrem & mihi simile quiddam in huius operis castigatione euenturum opinor. Nam istius ingratitude metus, animum mihi iam aggressuro, diu perplexum atque suspensum tenebat, & ab instituto penitus auocasset: nisi Bertheletus, singulari vir in bonas literas amore præditus, haud mediocriter animum aduersus huiusmodi Sycophantas confirmasset: seq; , tanquàm alterum Thesaurum, in his laboribus exantlandis adiunxisset. Huius tamen sententiæ (vlti quàm mihi per officium licebat) restiti, & operam meam hac in re constanter negabam. Tum, quod istam prouinciam vti dignum erat exornare, longe supra vires esse credebam, videreturq; res ipsa in linguis multo exercitiorum, & per omnia eruditiorum poscere: tum, quod ætas hæc nostra plurima habeat ingenia egregie ad res agendas nata, à quibus hoc sperandum atque expectandum putavi. Obiciebam præterea, non mediocriter tantum doctorum iudicium nobis metuendum, cui fortasse diligentia nostra & industria satisfieri possit, sed peritissimorum etiam & doctissimorum quorundam: quibus, nihil fere, nisi quod ipsi faciunt, placere solet: & quibus nihil satis doctum, maturum, expensum, elegans, exornatum, subime denique & omnibus numeris absolutum

vide-

videtur. Quibus omnibus sic breuiter ab illo responsum est: Neminem vnum omnia posse, nemini concessa esse omnia, neque expectandum cuiquam dum absolutus reddatur artifex: donis presentibus ad aliorum vtilitatem & commodum reipublice vtendum. Esse onus hoc magnum fortasse, & nobis propter inuidorum malevolentiam periculosum: dignum tamen in quo omnes nervos aetatis & industriae nostrae contenderemus. Adhuc, florere quidem hodie multa ingenia praestantissima: quae, si vellent & hac in re & in aliis, plurimum praestare possent: sed in tanta peritissimorum hominum multitudine, & studiorum varietate, alios aliis rebus ita intentos, ut vix sperandum sit eorum quenquam (nisi insigni proposito praemio) munus hoc suscepturum: in quo, voluptatis & delectationis minimum, laboris autem, studii, & difficultatis plurimum existat. Denique doctos, qui malignè carpunt aliorum pie susceptos labores, non plus metuendos, quam indoctos non intellecti operis contemptores: quum, utrosque constet affectibus non sana duci ratione. Studiosos forsitan & recte animatos hoc opere excitari posse: ut, & ipsi ingenii sui faciant periculum: & hoc quod Eliota feliciter incepit, nos studiose promouimus: illi denique absoluant & summam operi manum imponant. His ego persuasus delegatam mihi ab homine amantissimo provinciam amplius recusandam non putavi. Eisdem rationibus, causam nostram studiosis omnibus & equis lectoribus satis probari magnopere confido. Quibus si nobis satisfacere contigerit, magnorum laborum, multarumque vigiliarum, fructum nos suscepturos amplissimum putabimus. Illis enim scripsimus: illis solummodo studuimus placere. Alios vero qui hoc genus exercitationis in vniuersum improbant, usque adeo ut confici vocabularia cum Latinae linguae idiomatum interpretatione grauiter & moleste ferant: nec ipsi magnificimus, nec a studiosis hominibus audiendos iudicamus. Hi tamen, si qui sunt, (sunt autem plurimi, temerè in his suggeri iuuenibus calumniantes, quae alioqui cum magno cognitionis fructu ex bonorum authorum lectione discere oportuisset) hoc sibi responsum auferant: Varronis, F. Pompei, Perotti, Am. Calepini, & nostra item memoria, Nizolii, Riccii, Bas. Zanchi, Step. Doleti, Roberti Stephani, aliorumque doctissimorum hominum industriam nos imitari: qui, cum magna laude immortalique nominis memoria, in hoc scripti genere ante nos laborarunt: Quorum autoritas & exemplum tantum apud nos valet, ut cum illis decipi & errare honestius multo, & laudabilius fore putemus, quam istis magistris erudiri & instrui. Quid enim habent, cur non illos eodem condemnent crimine,

ne, si modo nos hac in re voluerint reprehendere? verè enim si extimabunt, sic constituent: in simili causa versari nos, atque nobis eandem cum illis rationem esse: Nisi fortasse laudant eos, quod obscura & difficilia (ut erant doctissimi) summa diligentia enucliarunt: nos autem ideo non probant, quod ista rectius quam illi praestare non potuimus. Quum iure potius optimo laudi nobis tribui oporteret: quod summis laboribus, atque vigiliis, eorum opera peruoluentes, sententias & interpretationes conferentes, hic cum vernacula interpretatione congestimus: quicquid ex his omnibus vtilitatis studiosa iuuentus exhaurire possit. Neque hic velim quicquam labores nostros eleuet, & Eliotae primum, nostramque deinde industriam derideat, nimis fastidiose iactans: Vni duntaxat nationi scripsisse nos: nimis breuiter omnia tradidisse: tyrunculis atque adeo puellis nosmet solum accommodasse: facilem ac nullius negotii operam praestitisse: quum ea modo in patrium sermonem transfuderimus, quae nobis alii latine copiosius exposuerunt. Anglis solum scripsisse nos fatemur certe libenter, atque id in primis gloriamur, vel ex hoc satis perspicuum esse, nos, singulari quodam in patriam amore, non externa gloriolae fama adductos, hanc suscepisse provinciam. Breuiter omnia tradere, nec integris authorum exemplis phrasas ubique illustrare, & operis commoditas suaserit, & necessitas impulit: ne in immensum excresceret volumen: quod vnum incommodum aureum illud opus Thesauri habet. Ad tyrunculorum sane captum nosmet illud opus submisimus, sed ita, ut exercitatissimi hic reperiant, quo sua studia iuuare possent. Nullius autem difficultatis esse, quod, ex aliorum lucubrationibus, quae ad nostrum usum essent, transtulimus, cur magnopere dicant nihil video. Nam & ipsi, quorum subsidio nostra maxime leuata est industria: ab aliis, qui ante eos in eodem stadio defudarunt: se non nihil adiutos ubique fateantur: nec tamen ideo nihil eos fecisse credendum est: quum ab omnibus in caelum iustissimis & verissimis laudibus efferantur. Denique, quod ad vernaculam interpretationem attinet, quid alii sentiant nescio: nos certe, qui iam experti sumus quanti laboris studiique sit, persancte vobis confirmare audemus, longe hoc difficilius nobis fuisse, quam si idem latine praestandum foret. Huius rei quae fidem vobis faciant, ut alia multa praetermittam: sexcenta nobis occurrebant vocabula ex Columella, Catone, Varrone, Plinio, & aliis, peregrina & rara, vel arti alicui propria: nec vlla vel ipsius authoris vel alterius interpretatione illustrata: quae transire facile potuissimus, si aliorum exemplo licuisset, integra ex authore subscripta sententia, verbi significationem lectoris iudicio

cio relinquere. Verum nos operis suscepti ratio cogebat, vel propriam rei cuiusq; appellationem addere, vel paucis vernaculè ita describere, vt etiam pueri vim ipsius vocabuli possent intelligere. Sed altius paulo & penitius huius operis difficultates introspiciamus. Vocabulorum quæ in Dictionaria plerumque conferuntur, quædam communia sunt & familiaria; quædam certis artibus & scientiis destinata. Familiarium certe verborum interpretationes aliquot vernaculè reddere, haud magni fortasse laboris est, quum omnibus nota sint, & quotidiano sermone protrita, obuia, & vbique occurrentia. Ago, fero, facio, duco, quid significant, nemo non nouit: verum istorum, & similium, varium apud auctiores vsum obseruare, & pro immensa hac varietate, diuersas, aptas tamen & conuenientes significationes apponere, vel quum vsus vocabuli verbo vnico satis indicari non potest, breuiter ex probato auctore phrasim & modum locutionis ita cum vernacula interpretatione subnectere, vt interim seruetur vtriusque linguæ idiotismus & gratia: hoc opus, hic labor est, hæ sunt de quibus tantopere quærimur difficultates. Hoc autem quanti sit, & quantum nos hæc in parte studii & laboris posuerimus, aliorumq; industriam adiuuerimus: illi deniq; scient, qui, vel infinitas Romani sermonis diuitias & elegantias (quas Cicero ne Græcorum opibus cedere existimabat) cum nostræ linguæ penuria tenuiq; suppellectili conferre: vel, ex Cicerone, Liuiio, Tacito, Casare, alioue scriptore classico quicq; Anglico sermoni tradere voluerint. Et vt sint fortasse nonnulli, qui hoc totum nullius momenti fecerint, quod illis vix vltimum operæ pretium videatur esse, si quis latina apte in matrum vertere sermonem calleat: Quando tamen M. Tullius, sine controuersia totius eloquentiæ fons, nonnunquam gloriatur se latine interpretando philosophiam patriæ familiarem reddidisse: & quædam ex græcis tam poetis quam oratoribus in suum vsum transferendo egregiam se nauasse operam credebat. Qui minus nostra laudetur industria, qui summo studio, summaq; diligentia sic latina vbiq; Anglicè interpretati sumus, vt vel pueri quoq; latina vernaculè, vel è contrario vernacula latinè, nullo fere negotio & cum aliqua ratione & gratia, nec ineptis & absurdis, sed appositis & accommodatis verbis reddere addiscant. Sed iam ad eorum verborum contemplationem veniamus, quæ artibus quibusdam & scientiis propria diximus: Quorum tanta varietas est, tamq; difficilis cognitio: vt nemini vnquam vni quantumuis πολυμαθῆι, & multifaria rerum experientia doctissimo, eorum omnium vernaculum cognouisse nomenclaturam arbitrer contrigisse. Huius generis sunt omnia instrumenta mechanica, vt fabri-

lia,

lia, tonsoria, rustica, nautica, textoria, bellica. &c. quæ propria sua habent vocabula, vix illis nota, quorum manibus quotidie reruntur. Idem etiam sentiendum de singulis operum partibus, quæ eisdem subiiciuntur artificiis. Quot res in ædificio sunt? quibus si à fabris sua nomina reddi posceres: magis mutos reperires quam pisces? Prætereo hic præcipuos illos loquendi modos, quos singuli opifices in propriis artibus sibi peculiare habent. In vna re nautica, quanta rerum varietas? quot locutionum formulæ? quot instrumenta nautarum vsui accommodata. quot naui ipsius partes? quot nauigiorum genera? vt, quæ ad hoc vnum spectent negotium exactè didicisse, non minimi laboris esse videatur. Eos ergo qui lexicon ex omni parte perfectum, & in quo nihil desyderetur, sibi conficiendum proponunt: omnes simul artifices in consilium adhibere oportet: vt ab illis rerum nomina discant, quibus singuli artificia sua tuerentur. Quemadmodum & nos frequenter ad materiarios fabros, ad olitores, ad textores, ad agricolas, ad rusticam turbam de nomenclaturis retulimus: & ab illis sumpsimus etiam, quæ rei congruerent propositæ. Iam vero herbis sua vocabula, quibus vulgo nuncupentur subscribere, quàm sit arduum, medicorum inconstantia, (qui in hac sola re multorum annorum studium posuere) satis probat. Apud illos enim hodie, in plerisq; doctissimi viri argumentum habetur, non herbam digito monstrare, nomine indicare, vel quæ sit breuiter definire: sed authorum qui de ea scripserunt pugnantem sententias numerare. Siquidem & Theophrastus, & cunctis in re herbaria a Galeno prælati Dioscorides, neque non apud latinos Plinius, tam diuersi plerumq; abeunt, vt in gratiam nulla possint orationis persuasione reuocari: & nonnunquam in herbule cuiusdam facie representanda, notas tam varie deliniant: vt quiduis potius quàm stirpem ipsam demonstrare videantur, vel certe eandem multiplicitate prorsus & varia effigie. Huc adde, quod vnaquequis regio suas habeat stirpes, sibi peculiare, qui nec vsquam alibi reperiantur, nec (cum in nullo vnq; vsu apud nostrates fuerint) Anglica nomenclatione reddi possint. Quid hic tæpus tererem in recensendis innumeris piscium, volatilium, serpentum, insectorum, gemmarum generibus? quorum omnium naturæ perscrutandæ, & nomina ediscenda sunt eis, qui nihil in Dictionario vernaculo deesse cupiunt. Quum ergo tantæ difficultatis, tantiq; studii res existat, quo quidq; certo & proprio vocabulo appelletur pernoscere: ne mox terræ cælum misceant nimium seueri alienorum operum censores, si quod forte verbum, parum apte materno sermone redditum, inuenerint. Sciant in opere tam spisso et vario, facilem esse lapsum: Imo non labi difficillimum: & per

et per omnia, omnium opinioni satisficere, nemini unquam concessum. Simul etiam memores sint, satis esse homines imprudentia lapsos non erigere: urgere vero iacentes & non potius in pedes rursus statuere, nimis esse inhumanum. Sed merces iam vobis coram sine fraude exponam: ut intelligatis quid, a nobis, in hoc opere præstitum, expectari debeat. Digestimus ordine alphabetico, quam fieri potuit commodissime ac diligentissime, latinas dictiones omnes, & peregrinas duntaxat eas, quæ a latinis usurpatæ sunt authoribus. Multas vero, quæ nullo latinorum usu probari poterant, ideoq; meram sapere barbariem videbantur, reiecit. Vocabula nonnulla, & plurimas locutionum formulas, quæ sapissime sine ullo ordine, cum maximo lectorum incommodo, temere spargebantur: ut in suas sedes fideliter restituerentur, studiosè laborauimus. Annotauimus præterea in nominibus genus & inflectionem. Verborum etiam præterita, quæ priori editione corruptissime legebantur, hic castigatiora reperies. Accentuum item ratio, non ubiq; a nobis prætermissa. Adhæc, Vocabulorum aliquot millia adiecimus, & verborum significationes innumeras: quæ non modo scriptoribus latinæ linguæ probatissimis, sed quotidiano etiam sermone usum habent amplissimum. Vnicuiq; dictioni vernacula vocabula accommodata & conuenientia, quasi vno acerno congesta, tantâ varietate subtexuimus: ut hic noster labor non tam ad expeditam Romani sermonis notitiam, quam ad nostræ linguæ ornatum, & elegantiam plurimum conferat. Phrases etiam & formulas locutionum, usum verborum aptissime demonstrantes, ex Cicerone & aliis latini eloquii principibus, ubiq; subscripsimus: quibus interpretandis, non verbum pro verbo anxie reddere, ut syllabas numerare videremur: sed vim vocibus subiectam pro viribus exprimentes, vtriusq; linguæ gratiam et elegantiam seruare, præcipuè studebamus. Præterea, propria nomina deorum, virorum, regionum, fluminum, oppidorum, quæ prius magna ex parte neglecta erant, item adiectiua & patronymica, ad poetarum lectionem maxime necessaria, tum ex Stephano, tum ex aliis, qui de eis scripserunt, in hanc editionem transfulimus. Deniq; vix credas quam varia & corrupta ubiq; esset, tum propriorum nominum, tum etiam vocabulorum latinorum orthographia, aliis aliter scribentibus: ita ut eadem dictiones diuersis sepe locis repeterentur. huic etiam vitio nostra diligentia succurrimus: & ubi probari possit varia verbi alicuius scriptio, lectorem ex vno loco in alium mittimus, ne frustra eadem repetere cogeremur. Postremo, errata, non in propriis solum, sed etiam in latinis innumera, castigauimus: quæ Eliota vel impressorum errore deceptus, aliis

falso

falso ascripsit: vel imprudentia & nimia festinatione lapsus, ipse designauit. In re herbaria (ubi plurima, nec immerito, nostri temporis medici desyderant) multa restitimus, aliqua adiecimus: Quum principio tamen animus esset, nihil, quod ad herbas & frutices attineret, aringere: ne committeremus, ut audacter verius quam prudenter ea res a nobis traderetur: in qua, nunquam singulare aliquod & præcipuum studium posuissimus: præsertim quum medici quidam, quos initio consulimus, tam fastidiose vota nostra reiecerint. Optauimus ergo magis, ut tam inconstans & varia fruticum et stirpium nomenclatura, a perito aliquo et exercitato viro describeretur: qui bonam ætatis suæ partem posuisset, in disquirendis et inuestigandis herbarum naturis. Pollicitus hoc est Turnerus, vir sane doctus et pius, cuius industriam omnes artis medicæ studiosi, auidissime expectant. Habes iam (lector humanissime) bona fide tibi exposita, quæ nos postrema hac editione præstitimus. Quæ non ideo velim hic a me adscripta putes, ut vel Eliotæ viro ornatissimo (quemq; propter singulare in bonis literis promouendis studium, semper amantissimum) tanquam negligentem atque oscitantem insultare, vel meritis eius laudes imminuere videar: sed potius ut tibi, amice lector, hoc pacto labores nostros utcumq; ob oculos proponerem, atque apud te aliquod nostræ industriæ specimen ederem. Nunc ergo si studia tua quicquam a nobis iuuari putabis, sudoribus nostris & vigiliis fructu non ingratus: et Vdallo viro doctissimo, cuius eruditissimis annotationibus multis locis leuati sumus, dignas laudes gratiasque tribue. VALE.

Albinus, the name of an Emperour. also the surname of diuers Romans.

Albion, and Bergion, two gigantes the sonnes of Neptune, slayne by Hercules.

Albion, (the moste auncient name of this Ile) containeth Englands and Scotlande: of the beginning of whiche name haue been sundry opinions: One late feigned by hym, whiche first printed the Englyshe chronicle, wherein is neither similitude of trouth, reason, nor honestie: I meane the fable of the fifty dayes of one Diocletian kyng of Syria, where neuer any other historie maketh mention of a kyng of Syria, so named: also that name is Grecke, and no part of the language of Syria. Moreover the comynge of them from Syria in a shyppe or bote without any marynours thotrough the sea called Mediterraneum, into the ocean, and so finally to fynde this Ile, and to inhabyte it, and haue generation by diuels, is both impossible, and muche reproche for this noble Realme, to ascribe hie first name and habitation, to such inuentours. In other opinion is (whiche hath a more honest similitude) that it was named Albion, ab albis rupibus,

of whyterockes, because that vnto theine, that come by sea, from the east or south, the bankes and rockes of this Ile dooe appere white. Of this opinion haue I most meruaile, because it is written of great learned men. First Albion is no large woode, nor hath the analogie, that is to say, the proportion or similitude of latine. For who hath founde this syllable, on, at the ende of a latine woode. And if it should haue ben so called for the white colour of the rockes, men woulde haue called it Alba, or Albus, or Album. In Italy were townes called Alba, and in Asia a countrey called Albania, and nephew of them toke their beginning of whyte rockes or walles, as ye may reade in booke of Geography: nor the water of the ryuer called Albis, seemeth any whiter than any other water. But if where auncient remembrance of the beginning of thynges lasteth, it may be lefull for men to vse theyr conjectures, than maie myne be as well accepted, as Plinius (although he incompably excelled me in wysdome and doctrine) specially if it maie appere, that my conjecture shall approche more nere to the similitude of trouth. Wherefore I wil also sette forth myne opinion, onely to the intent to exclude fables, lackynge either honestie or reasonable similitudes. When the Greeces began first to prosper, and their citees became populous, and wared puissant, the whiche traualled on the seas, and also the Isles in the seas, called Hellepontus, Aegeum, and Creticum, after that they knew perfectly the course of sailynge, and had founden thereby profyte, they by little and littell attempted to serche and fynde out the commodities of outwarde countreys, and lyke as Spanyardes and Portingales haue late doon, they experienced to serche out countreys before vnkownen. and at last passynge the streytes of Marroche, they entred into the great ocean sea, where they founde dyuers and many Isles. Amonge whiche they perceyving this Ile to be not onely the greatest in circuit, but also most plentiuouse of euery thyng necessary to man, the apte most holysome and temperate, the earth apt to bynge forth al thynges that maie susteine, the fleshe of beastes and mynions most sweete and delicate, the wull most fyne, not lackynge any kynd of mettal, hauynge abundaunce of woodde and timber to buylde with, also great and fayre ryuers, with great lakes or meeres of freshe water, and as wel in them, as in the sea, wherewith the countrey is enuyroned, was great plenty of fyshes, of byrds, fowles most apt to be eaten: they wonderynge and reioysynge at theyr good and fortunate arriuale, named this yle in grecke Olbion, whiche in englyshe signifith happy, in latine Felix. Ite as part of Arabia, which is most fertile, is called Arabia felix. But in processe of tyme, by reioysynge of sundry people, hauynge dyuers languages, no meruaile though one letter were chaunged, and the first letter, O, tourned into A. And so for

Olbion, it was at the last called Albion, which woode hath no maner of significacion. This chaungynge of letters is not vnkely, sens at this present tyme the northerne men of this realme do vte A, in woordes, where southerne men vse O, as a bane, a stane, a bare, a band: for a bone, a stone, a boye, a bonde. And amonge the Greeces were lyke alterations of letters. And it may be more easily bozne, that one vowel may be chaunged in a woode, and specially A, into O, whiche in somme mans mouth, towneth often tymes like, than that a syllable impertinent to the proportion of latine, shoulde be vnaptly added to. Not withstanding Pomponius Mela maketh mention of a graunt called Albion, whom Hercules slewe in Gallia, whiche was sonne of Neptuneus, who mought with more reason be deuced the first geuer of his name to this yle, than that the other surmysses shoulde be likely. If any man can fynd matter more certayne, concernynge the beginning of this Ile, I will not bee offended, but congratulate with him his good fortune and diligence.

 Aristides, a noble man of Athens, in wisdom iustice and temperance excellent. He in the gouernance of the common weale of Athens, was ioynted with Themistocles, a man of great prowesse and cycheffe, who saied in the counsaile, he knew a thyng, whiche was expedient to the common weale, but not necessary to be openly knowen, and despyed to haue one appoynted, to whom he shoulde disclose it. The counsaile appoynted Aristides: to who he shewed, that the nauy of the Lacedemonians mought be shortly sette on fyre, and so shoulde their puissance be abated. This herde, Aristides returned to the counsaile, and saied: The aduise of Themistocles is profitable, but not honest. The Athenienses hearing it was not honest, iudged, it mought not be profitable, and woulde not haue it than disclosed. Suche credence had thei in Aristides. Also not withstanding the Athenienses had cryed him, onely because he excelled in iustice, yet at his departing he prayed to god, that what he couer they desired, mought come to good effect and conclusion. And called agayne from exyle, he neuer remembred any olde displeasure, in so muche that he alway honoured Themistocles, with whom he euer contended in the weale publike. Of his temperance this is a great token, that though he had ben in the greatest dignitee and offices in the commune weale, yet died he so poore, that he left not to bury him worshipfully. And his daughters were married at the charge of the citee. And to his sonne Lysimachus was geuen by the people one hundred Mina, which amounteth of our money to, 239. l. xi. s. viii. d. Wh, how may christen men be ashamed, when they rede this story, beholding in his temperance, iustice, and charitee, a more resemblance of Christis doctrine, than is in them that will dooe nothing vnhyed, & measure iustice by thei affectiōes. Of this name were. iiii. other. he was afore the incarnation. 474. peres.

**B**ritania, the moste noble Ile of the world, wherin be conteyned Englad and Scotland. It lieth from Germany weste, from Fraunce and Spayne, west northwester. The fourme thereof is lyke a triangle: and (as some haue wryten) lyke the blade of a gleue. The length is extended into the north to the fur-

thermost part of Scotlande, called Calidonia, whiche Plinius, Solinus, and Marciannus dooe agree to be .800. myles. The bredth of it (after Marciannus) is .300. Italian myles. The narrowest distaunce betwene this yle and Calyps landes (called of Plinie Gessortacum in Gallia) is .50. Italian myles. It is now gessed to be 30. englyshe myles. Of the fyrst namyng of this yle is yet no certayne determination, for as muche as there remaineth no auncient history, making therof remembraunce, the olde Byrons booke (suche as were) beeyng all destroyed by the Saxons: who indouered them selfe to expunge vnterly the honourable renoume with the name of Byrons, lyke as the Gothes dele with the Romans. Also the part of Citus Luuius, where the conquest of Britayne is remembred, with the histories of Julius Rusticus, and dyuers other noble wyters, that wryte specially of this countrey, are bitterly perished. Suche as remaine, as the commentaries of Julius Caesar, Cornelius Tacitus, Diodorus Siculus, and thei that wryte of Cosmographie, haue omitted the oppynall begynnyng of the name. The history of Bedas the Byron, can not bee founde, who was after the Saxons had invaded this royaume. And there fore mought lache suche booke, as shoulde best instruct him. As for Beda seemeth to haue scene nothing wyrtten of that matier. For wherhe saith, that this yle toke the name Britania, of the inhabitants of Britayne in Fraunce is nothing lyke to be true. For that countrey was (not longe before the tyme of Beda) named Armorica & Armonicus tractus, whan this yle was called of most auncient wyters Britania, and (as Solinus wyrteth) seemed to be an other worlde, for as muche as the weste parte of Gallia was thought to be the uttermost part of this worlde. Also Julius Caesar wyrteth, that the places of this yle were vnknewen to Frenchemen, sayng to a fewe merchautes: and yet they knew no farther than the sea coste towards Fraunce. More ouer the same Byrons asseyne, that it was left amonge them in remembraunce, that the innermost part of the countrey, was inhabited of them, whiche had thei fyrst begynnyng in the same yle. This well considered, with the auctoritee of the wyter, both an excellent prince, and also a great learned man, and was him selfe in this yle: it is not to be doubted, but that he most diligently searched for the true knowlage of the auncient thei of. And if he mought haue founden, that the inhabitants had come of the stocke of Eneas, of whose progenie he him selfe came, he wolde haue reioyced muche, for the prowesse and valiant courage, which he commended in them. Moreover, that the name began of Brutus (whom our wyters imagined to defend of Eneas the Troiane) is no more lykely, than that this yle was called Albion of Dioclians daughter, or of white rockes. All the olde Latyne historians agree, that

the son of Siluius, the second in succession from Eneas, and of them named the sonne of Britanus, was Eneas, called also Siluius. wherunto the Grekes doe also accorde, but that they name Siluius to bee byother to Britanus: and bothe after the death of Eneas, and was therfore called Posthumus. But neyther the Romayns nor the Grekes dooe wyte of any man called Brutus, before Julius Brutus, whiche expelled Tarquinus out of Rome. whiche name was also geuen to him (by the sonnes of Tarquine) in derision, because they toke him to be foolish and dull witted. Moreover, there is so muche dyuersitee betwene Britania and Brutus, that it seemeth agaynst reason, that the one shoulde procede of the other. For if Brutus had ben the geuer of the first name to this yle, he wolde haue called it Brutia, or Brutica, rather than Britania, whiche hath no inner propoition or analogie with Brutus. But now wil I (as I haue doen in the worde Albion) declare a reasonable cause of coniecture, why this Ile was named Britania. About xxx. yeres sens, it hapned in wylshyre, at Juy church, about .ii. myles from Sarisbury, as men dygged to make a foundation, they founde an hollow stone covered with an other stone, wherin they founde a booke, hauyng in it litle aboue .xx. leaues (as thei saide) of very thicke belime, wherin was some thing wryten. But whan it was shewed to priestes and charyons, whiche were there, they coude not reade it. wherfore after they had tolled it from one to another (by the meane wherof it was tozue) they dyd neglect and cast it aside. Longe after a piece thereof hapned to come to my handes. whiche not withstanding it was all to rent and defaced, I shewed to maister Richard Hade, than chiefe secretary to the hynges most royal maiestee, wherof he exceedingly reioyced. But because it was partly rent, partly defaced and bloured with weate, whiche had fallen on it, he coude not fynde any one sentence perfect. Not withstanding after longe beholding, he shewed me, it seemed that the saide booke conteyned some auncient monument of this yle, and that he perceiued this worlde Prytania, to be putte for Britania. But at that tyme he saide no more to me. Afterwarde, I geuyng muche study and diligence to the readdyng of histories, considering wherof this worlde Britania fyrst came, finding that at the ples in this part of the Ocean, were called Britanie, after my fyrst coniecture of Albion, remembryng the saide olde wrytyng, and by chance finding in Suidas, that Prytania in greke, with a considered aspiration, doth signify metallas, fappes and marketes, also reuenues belonging to the commune treasure: I than conceived this opinion, That the Grekes flourisshyng in wylschyre, prowesse, and experience of saylyng, beyng entered into the ocean sea, founde in the ples great plenty of tynne, leade, yron, brasse, and in dyuers places golde and syluer in great quantitee, they called all those ples by this

generall name Prytania, signifying the place, by that whiche came out of it, as one woulde saie, he went to the mart, whan he goeth to Andwarpe, or Barrow: or to the fapre, whan he goeth to Sturbidge: or to his reuenues, whan he goeth to any place, from whens his reuenues dooe come. And yet, because this yle called all the other in euery condicon, it was of some priuately called Albion, that is to saie, more happy or rycher. This coniecture appoetheth more nigh the true similitude, than the other intensions, except there bee any auncient history before the tyme of Gessrey of Hounmouth or Beda, which may more probably conserue that I haue declared. To suche wyl I gladly geue place. Finally I thought it alwaies more honourable, to haue receiued the fyrst name by such occasion as I haue reherced: And the generation of the inhabitants of this land, to bee eyther equall with the most auncient, or mixed with the most wyse and valgant people of Grece, vanquishers and subduers of Troians: than to take the name and fyrst generation of a vayne fable: or of a man, if any suche were, which after he had slayne his father, waned about the worlde, vncertaine where to dwell. Also to aduante vs to come of the Troians, causes of thei owne countreys destruction, by fauouryng the aduouty of Paris and Helena, of whom neuer proceeded any other notable monument, but that they were also breakers of thei othe and promesse. yet this folly is founde almost in all people, whiche contende to haue thei progenitours come fyrst out of Troie. whiche fantasy maie well bee laughed at, amonge wise men. The saith of Christ was fyrst receiued in this royaume, after the incarnation. 156. yeres.

Marcus Cato Censorius, because he alwaies vsed the grauttee and rygour that was wont to be in the correctours of maners, cald Censores. Also he him selfe beyng Censor, was aboue all othyr most sharpe and rigorouse. Valerius Max. writeth, that he was almost an olde man er he learned latin letters, and than it semeth he was olde er he learned greke. yet not withstanding by gatherng bygdmentes out of Cicidides, and Demosthenes wozkes, he became the great test oratour of his tyme, and was called the Romayne Demosthenes. He beyng made consull, wanne moe citees in Spayne, than he had as boden daies in that countrey. In whiche tyme he reneyed to him selfe, nothyng of al that was founde there, but meate and drynke onely. He made his souldiours ryche, geuyng to euery of them a pounde weyght of syluer, sayng, Better it were, that many Romaynes retourned to Rome with syluer, than a few with gold. He taught his owne sonne grammer, not withstanding he had a seruaunt called Chylo, an excellent grammarian, and taught a great schole, sayng: It is not conuenient, if my sonne be slow of learnyng, he shoulde be rebuked or pulsed by the eares of him, that is of a scruple condicion. He also taught him the ciuile lawes, the exercise of all weapons, to ryde well, to fyght with the spytes, to susteyn both colde and heate, to leape into waters, and swim against swyft streames. Beyng Censor, he spared none estate, whose maners he founde corrupted, or superfluous in luyng, whereby he brought into the citee a meruaylouse ymage of vertue. his sentences reherced by Plutarke be wonderfull, of whiche I will remembre thre. Like as the dyers, said he, dooe dye most often that colour, whiche thei doe perceiue most men desyre in: so yonge men doe most studiously haunt and imbrace that, whiche thei see olde men and counsailours haue in most estimation. He blamed the people of Rome, for that thei commytted authoritee and offices oft times to one persone, sayng, They seemed not to esteeme rule and authoritee, or els they supposed there were but few worthy of promotion. The one was a signe of contempt, the other discourag to good wittes, and rebuke to their countrey. Whan thre ambassadours were chosen to be sent into Bithynia, of whom one had the goue, an other peine

in his head, & the third tymorous, Cato laughyng, said in the senate, The people of Rome sendeth an ambassade, which hath neither feete, head, nor heart. The lyfe of this and of the other Cato, are worthy to be often tymes red, specially of counsailours and men in authoritee. He was before the incarnation. 182. yeres.

Cato Vicensis (so called because he slew him selfe in the towne Utica, to whom the other Cato Censorius, was great graundefather) shewd a wonderfull constaunce and grauttee euen in his childehode. seldome mery or seeme to laugh, and if he dyd, it was a very little smyllyng: not lightly angry, but if he were, he was not soone appeased. He was verie studiouse in all morall philosophie, practisyng in his actes and luyng, that whiche he radde of vertue and honestee: and studied cloquence only to the intent, that in counsaylyng and reasonyng, he mought adde vnto philosophy more force and ornament, and yet wolde he not practise it openly. whan one said to him, men dispraise thyne obstinate silence, he answered: I forye not, so thei dispraise not my luyng. But I will breake out of this silence, whan I can speake that is worthy to be spoken. Beyng Tribunus militum, he was sent into Saredonie, where with his mers uapulous grauttee, pyudence, and pinesfulness, he made all that were vnder him fierce and hardy against their enemies, gentill to thei fellows, fearfull to doe iniury, prompt to get prayes: and him selfe labouryng with them, vsyng his apparall, feedyng and goyng like vnto them: he contrary to mens expectacions (not withstanding his leuetytee) wan the hertes of them, goyng on foote and talkyng with euery man. He was of such constance, and so farre from ambition and flattery, that nother Pompey nor Cæsar, in thei chiefe pyde, whan all men, either for dread or fauour, inclined to their despyres, coulde perswade him to agree to their mindes, in cases where it seemed to be against the weale publike: nother mought any maner meynayng or dreadfull tokens moue him from that constancie. In so muche, that whan he herde that Cæsar had vanquished Pompey, & that his frenche would haue sent to Cæsar, to desyre his fauour, he answered: They which are vanquished, or haue any wise trespassed, ought to make suite, but he in all his lyfe was neuer vanquished, and in many cenes surmounted Cæsar, who in making warre agaynst his owne countrey, had condemned him selfe to haue doen that thyng, whiche he had often denied. Finally not for malice of Cæsar, but because he wolde not beholde the weale publike destroyed, he slew him selfe at Utica, hauyng with him at supper, the euening before, the greatest officers of that citee, and many of his frendes. Also this sentence beyng spoken amongst other: Onely a good man is a free man, al p men are bond: whan one happened to reason agaynst it, Cato beyng therewith chaufed, disputed with the other so vehemently and longe, that al men suspected that he would

woulde not longe lyue. He died before the incarnation. 44. yeres.

 Cicero, ónis, ma. ge. the surname of Marcus Cullius, whose diuine eloquence, abundant learning, sharpnesse of wit, dexteritee in actes, and most ardent loue to the common weale of his cuntry, can not be sufficiently expressed by a mortall mans tongue: for pen. he lineally descended from the auncient kynnes of the Tullians: all be it tyme and occasion wearyng out dignities in bloud, his name continued longe

In the state of worship. His auncetours were called Cicerones, because Cullius Appius, a noble king of the Volscians, had on his nose, a marke lyke a chiche pease, called Cicer. In his childehode, he so excelled all other children in witte, that they fasters meued with his fame went purposely to the schoole, to beholde and here him. He so profited in the eloquence of greke and latine, that not only his companions were in a meruailous admiration of him: but also Apollonius (the most excellent oratour at that tyme) hearyng him, and not speasyng a great space, saied at last: Cruelly Lirero, I ppraise the, and meruayle at the: but I lament the fortune of the Grækes: whan I consider, that by the learning & eloquence, whiche were left vnto vs only, are euen now translated vnto the Romans. whiche sayng, was afterwarde founde true. For loke what subtiltie was in logike, what commoditie in morall philosophy, what secreete knowlage in philosophy naturall, he knew it (as Tacitus writeth) and declared it in latine most eloquently. And he being but a very yong mā, came to practise in Rome, studied abundantly the ciuile lawes, was meruailously occupied in great weighty causes. And after he was Senatour, was continually (as it seeme) most busy about the weale publike. yet he that exactly redeth his works, shall thynke he neuer did any thing but reade great authours, and write booke. For there was no philosopher, no oratour, no poet afore his tyme that escaped him, as dooth in his booke sufficiently appere. And yet howe manie booke made he: fens we haue not the thynde part of them, yet suche as we haue, if any man now dyd write so muche and so well, we sholde thynke him to haue spent the moze part of his tyme in writing. And noble Cicero, loyde god how many thynges did he exployte by his wisdoms and diligēce, in most weighty affayres, as well in warre as peace: how dyd he by his dextertee and prudence saue the citee and people of Rome from the most pernicious confederacy and rebellion of Catiline, and othe of the nobilitie, whiche went about to destroy the weale publike, and robbe the citee: how perserued he the same citee and people after the death of Cæsar, that they were not oppressed by Marcus Antonius: For his incomparable actes, the whole Senate and people gaue to him, fyrst before any, the name of father of the countrey. what trouble and mysery suscepned he, being cryed by the procurement of Cædus, onely for the putting of the saied resbelles to death: Suche is the reward of people vnstable. likewise for duryng Antonius out of Rome, and by his sharpe oracions, causyng him to be proclaimed enemy to the weale publike: he made Antonie so muche his enemy, that in the treaty of peace betwene him and Octavius: he demaunded Cicero, to doe with him his pleasure. whiche thyng graunted of the vnkinde Octavius (whom Cicero had brought vp, and by his meanes caused to bee made chiefe gouernour of Rome) Antoni sent one

Herennius (whom Cicero had saued from death by his eloquence) to pursue him as he fledde, whiche thyng whan Cicero perceiued, he abode his comyng. And lyng in an house lytter for weakenesse, he dyd with constant eyes prepare his throte to Herennius: who dyd (all othe men abhorryng) stryke of his head, and hande, and brought them to Antonie: who receyuyng therat, caused the head and hande to be set ouer the place of ciuile iudgements at Rome. whiche dauidly beholden of the Senate and people of Rome, was lamented. In the state of worship. His auncetours were called Cicerones, because Cullius Appius, a noble king of the Volscians, had on his nose, a mark like a chieffe pease, called Cicer. In his childhode, he so excelled all other children in witte, that they feareders meued with his fame went purposely to the schoole, to beholde and here him. He so profited in the eloquence of greke and latine, that not only his companions were in a meruailous admiration of him: but also Spollonius (the most excellent oratour at that tyme) hearyng him, and not spearyng a great space, saied at last: Cruelly Cicero, I pzaple the, and meruayle at the: but I lament the fortune of the Grekes: whan I consider, that by the learning & eloquence, whiche were left vnto vs only, are euen now translated vnto the Romans. whiche sayng, was afterwarde founde true. For loke what subtiltie was in logike, what commoditie in mozall philosophy, what secreete knowlage in philosophy naturall, he knew it (as Tacitus writeth) and declared it in latine most eloquently. And he being but a very yong mā, came to practise in Rome, studied abundantly the ciuile lawes, was meruailously occupied in great weighty causes. And after he was Senator, was continually (as it seemed) most busy about the weale publike. yet he that exactly redeth his workes, shall thynke he neuer did any thing but create great authours, and write booke. For there was no philosopher, no oratour, no poet afore his tyme that escaped him, as dooth in his booke sufficiently appere. And yet howe manie booke made he? sens we haue not the thyde part of them, yet suche as we haue, if any man now dyd write so muche and so well, we shoulde thynke him to haue spent the more part of his tyme in writing. And noble Cicero, forde god how many thynges did he exployte by his wisdome and diligēce, in most weighty affayres, as well in warre as peace: how dyd he by his decretes and prudence saue the citee and people of Rome from the most pernicious confederacy and rebellion of Catiline, and other of the nobilitie, whiche went about to destroy the weale publike, and robbe the citee? How preserved he the same citee and people after the death of Cesar, that they were not oppressed by Marcus Antonius? For his incomparable actes, the whole Senate and people gaue to him, first before any, the name of father of the countrey. what trouble and mysery suffered he, being cryed by the procurement of Clodius, onely for the putting of the saied rebelles to death? Suche is the reward of people vnstable. likewise for driuyng Antonius out of Rome, and by his warpe orations, causyng him to be proclaimed enemy to the weale publike: he made Antonie so muche his enemy, that in the treaty of peace betwene him and Octauius: he demanded Cicero, to doe with him his pleasure. whiche thyng graunted of the vnkinde Octauius (whom Cicero had brought vp, and by his meanes caused to bee made chiefe gouernour of Rome) Antoni sent one
